

EDITION (of this attachment paper) 2014-12-11

In this decoder the following
ZIMO sound project is loaded:

**standard gauge diesel
 locomotive ALCO C425, V.2**
 (from decoder software version 33.10)

The ALCO Century 425 was a four-axle, 2500 hp (1860 kW) Diesel-electric locomotive of the road switcher type. Between October 1964 and December 1966, 91 units were built.

ZIMO decoders with this sound project can be installed in all fitting models.

ATTENTION: After the decoder installation a measuring run is required → CV # 302 = 75

In this sound project the functions are assigned as follows:

key	device	function output	function / sound
